FROM THE DIRECTOR

Hi, I'm Michael — founder / owner of Loans Guide Australia.

If you're like most business owners I speak to, you're not just looking for a loan — you're looking for a bit of breathing room. A way to take that next step without jumping through hoops, waiting weeks, or feeling like just another number at the bank.

That's exactly why I started this business.

I saw too many hardworking Australians being overlooked or misunderstood by traditional lenders. Good businesses — with great potential — missing out on opportunities simply because they didn't fit into a rigid checklist. I knew there had to be a better way. So I built one.

At Loans Guide Australia, we make business lending simple, fast and stress-free. But more importantly, we make it personal.

We've partner with over 150 lenders across Australia — including banks, non-bank lenders and fintechs — so we can give you real choices. Not just the same loan that everyone else gets, but something that actually suits your business, your cash flow, and your goals.

We use advanced AI technology that outperforms traditional lenders and other brokers — delivering personalised loan matches up to 50% faster than the competition. While others rely on outdated systems and guesswork, our smart matching engine analyses real-time data from our panel of lenders to pinpoint the best-fit loan options for your business without impacting your credit score.

We strive to keep things clear, honest and efficient — and we get results. In many cases, we've helped business owners get approved and funded within 24 hours.

Whether you're looking to grow, manage cash flow, upgrade equipment, or just get a fresh start — we'll do the heavy lifting so you can focus on running your business.

This isn't just a job for me — it's personal. I've built this company to help people like you make smarter, faster, more confident decisions about finance. And when we get it right, we don't just see numbers go up — we see families supported, staff hired, goals achieved.

If that sounds like the kind of help you're after, then let's see what we can do, together.

Regards,

Michael Barton
